Staphylococcus epidermidis

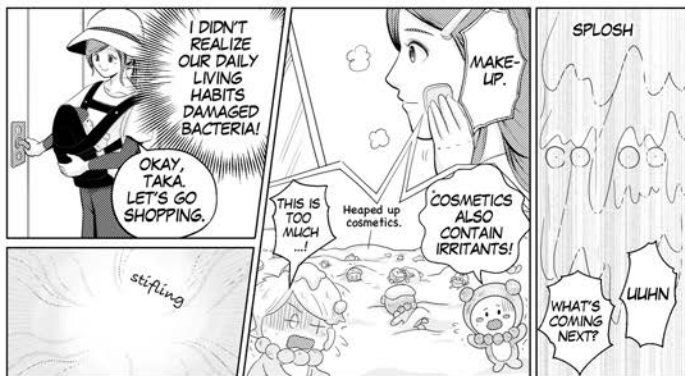

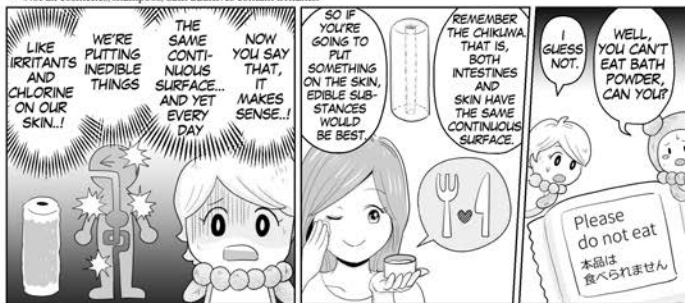

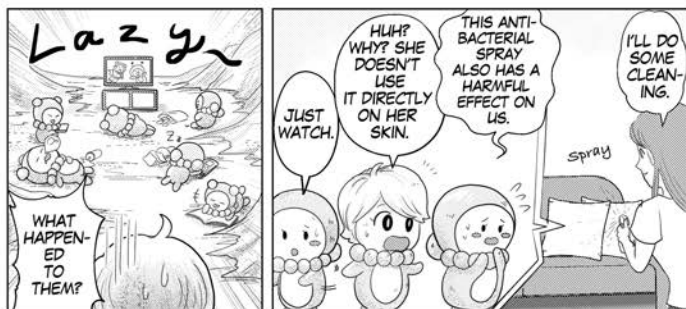

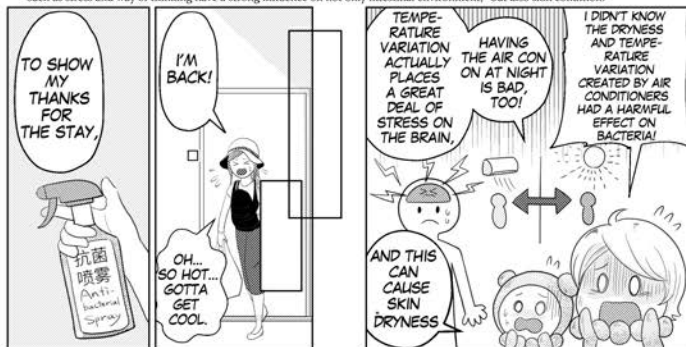

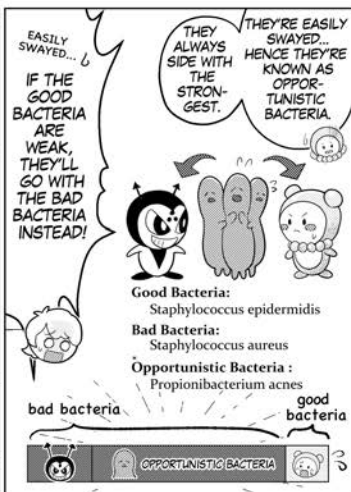

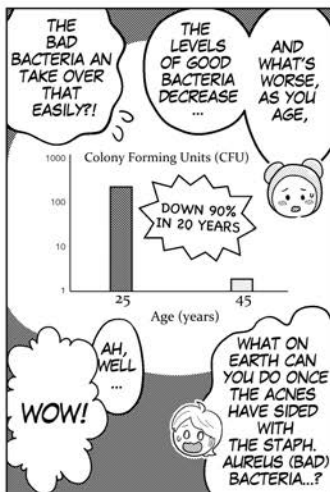

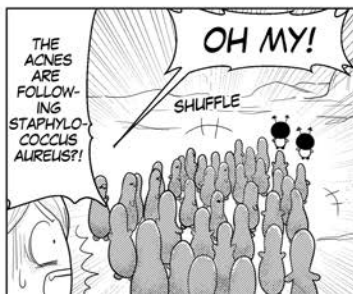

* Recently the "BRAIN-GUT-SKIN AXIS" has been the subject of research. Factors relating to the brain such as stress and way of thinking have a strong influence on not only intestinal environment, but also skin condition.

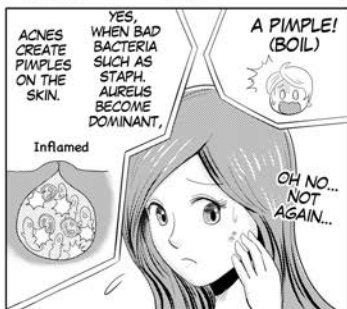

* They always pick the stronger side. When they take sides with bad bacteria they cause skin roughness/trouble.

"THE DOGGY & KITTY CLUB"

Killing of cats and dogs is a problem
in Japanese society,
and one of the causes is
a lack of an "approval system"...

In countries with more advanced animal welfare
must have licenses.
If owners and breeders do not meet
certain requisites they are unable to keep pets.

Japan should also introduce an
"approval system" to create a
society which "values life".
